A NATURAL PROGRESSION

Innovation is in our DNA. From our humble Northern Michigan beginnings, we have always strived to serve the landscape industry by providing products that are better looking, easier to work with, and more durable than their alternatives. We're continually driven by the challenge of finding the better way: better aesthetics, better design, and better strength.

As Rosetta, you helped us steadily push the needle forward: staying ahead of the curve with outdoor living products that married the industry's most realistic textures and colors with materials of unparalleled strength and durability. Beginning with Outcropping, the first life-sized wetcast wall for your backyard, and continuing through our entire line of wall, patio, and fire products, we've never stopped chasing the better way.

That chase has led us to HIGH FORMAT™. But it's more than just a name change. As HIGH FORMAT™, we aim to better serve you by providing access to a greater range of products, materials and technologies to spark your creative passions. In addition to the wetcast walls and slabs that you know and love, we're continuing to innovate with our new large-format, ultra-thin and super-durable TEKTRAMAT® products. And we've expanded our offerings to include access to some of the most beautiful and hard-wearing natural stone slabs available anywhere.

What's not changing is our dedication to quality and service. We're the same team you've always worked with. And we aspire to continue serving you with products that are better looking, easier, and more durable than anything else on the market. From all of us, thank you for choosing HIGH FORMAT™!

MATERIALS & TECHNOLOGIES

WETCAST

HIGH FORMAT™ products are primarily made of concrete utilizing our wetcast production system. Wetcast concrete offers benefits including:

- Detailed, natural looking textures
- Seamless blending of colors throughout
- Long-term structural integrity

TEKTRAMAT®

TEKTRAMAT® is our proprietary material based around ultra high performance concrete technology (UHPC). Products made from this material offer benefits including:

- Efficient installation resulting from large yet thinly formatted shapes
- Ultra-realistic replication of fine detail
- Unsurpassed durability including salt proof surface

NATURAL STONE

HIGH FORMAT™ offers several slabs made of natural, premium quality travertine and marble stone. Responsibly harvested from nature, this material offers benefits including:

- Honed, non-slip surface
- Gauged thickness with precise dimensions
- Vibrant and unique color patterns

VIBRALOCK™

VIBRALOCK™ is an integrated surface technology that is directly incorporated into the production process of many of our slab and paver products to deliver benefits including:

- A harder surface with greater resistance to abrasion
- More vibrant and enduring color
- Increased resistance to efflorescence

POLYMERIC SAND

FERTILIZER FOR ORGANIC USE

EVOLUTION

- High performance polymeric sand for joints up to 4 inches.
- Over 15 years of proven exceptional performance.
- A unique, multi-purpose, haze free formula with enhanced polymer binding technology.
- Time-saving, one step watering process.
- Easy sweep, dust reduced formula.
- Available in five unique and natural colors with no added pigment (no discoloration over time).

EVOLUTION, the only sand you will ever need.

GROGANIX

- OMRI Listed for organic use.
- Organic soil amendment, improves poor quality soils (turf, garden, flower beds, food plots).
- Filler free: Black Gypsum (10% humic acid) replaces hard to breakdown limestone fillers found in most synthetic fertilizers.
- Disperses evenly and provides immediate and readily available nutrients to the plant.
- Promotes root growth and energy production.
- Provides consistent greening and growth.
- Helps neutralize pet urine spots.
- Waterway safe.
- Contains no human or poultry waste.
- Safe for your family and pets.
- Available in two premier mixes.

BEIGE

WHITE (Special Order)

The OMRI Listed Seal assures the suitability of a product for certified organic production, handling and processing in the United States.

LIFETIME LIMITED WARRANTY

We want you to feel comfortable and confident when starting your project. That's why we make sure you have the resources you need to get the job done right. Everything we make, we back with a lifetime limited warranty.

HIGH FORMAT™ products as manufactured by HIGH FORMAT™ are backed by a lifetime limited warranty from the manufacturer to the original end user, for products used in residential applications. This assurance of product quality is applicable where products have been correctly installed to manufacturer's specifications. Any properly installed hardscape material manufactured by HIGH FORMAT™ that deteriorates due to the concrete in the product not meeting the design strength specification will be replaced by the manufacturer. The following items are not covered by this warranty: color variances and the appearance of surface stains resulting from chemical reactions such as efflorescence or differential curing; damage caused by installation, misuse or abuse of the materials; deterioration caused by de-icing salts or fertilizers; damage resulting from sub-grade settlement or movement, hairline cracks that do not affect the structural performance of the product, spalling of less than three percent of the surface area, contact with chemicals or paint, discoloration due to airborne contamination, staining, oxidation, or improper sealing. Products purchased must be registered with the manufacturer within 60 days of end user's purchase for warranty to be valid. You may register your project at HIGHFORMAT.COM/WARRANTY.

All warranty claims must be made prior to the removal or disposal of the defective product. Warranty claims will be reviewed by a company representative and may require samples of defective product for analysis. Warranty does not include removal, installation, or transportation to replace the material. Warranty is not transferable and is extended to the original end user only. Proof of purchase is required.

For additional questions please contact us at (877) 777-6558

ADDITIONAL INFORMATION

COLOR:

We at HIGH FORMAT™, along with our media partners, do our best to produce print and digital materials that accurately reflect the true shades and tones of our product. However, we cannot guarantee perfect color matching for project photos, color swatches, or other picture representations. Final color selection should be made from actual material which can be viewed at your local dealer location.

Integral pigments are incorporated into the raw materials for all HIGH FORMAT™ products to intentionally produce subtle shades and color variations throughout each block or paver. Therefore no product seen in a photograph will be precisely duplicated. For the most natural appearance, install products from multiple pallets simultaneously. This will create a blended, natural look.

EFFLORESCENCE:

Efflorescence is a naturally occurring, chalky, white residue commonly found on concrete surfaces. The presence of efflorescence in no way degrades the integrity of any product. It can usually be removed with efflorescence cleaners and often washes away over time. HIGH FORMAT™ does not cover the presence of efflorescence under warranty.

PACKAGING:

Variation in color can occur where packaging comes into contact with the product. Often, these variations will fade with time. This does not affect the integrity of the material, and it is not considered to be a defect. Color variation caused by contact with packaging materials is not covered under warranty.

POLYMERIC HAZE:

Improper installation of ancillary polymeric sand products may result in the presence of polymeric haze. This discoloration can potentially mute the vibrant colors of concrete products. Hazing is not indicative of the quality of the HIGH FORMAT™ product, and should not be considered a source of concern for the product's durability. Because HIGH FORMAT™ cannot regulate selection or installation of aftermarket accessory materials, we do not warranty against the presence of polymeric haze. In general, polymeric haze can be cleaned and washes away over time.

HEAVY EQUIPMENT:

The broad surface dimensions of HIGH FORMAT™'s slab products are not engineered for vehicular traffic and compaction equipment. The exception to this exclusion is the more traditionally dimensioned Mission and Amaro paver collection. Both Old and New Mission, as well as Amaro, can be used as driveway pavers and/or finish-compacted. If a compactor is used to aid in installation of Old Mission, New Mission, or Amaro Pavers, then a urethane pad should be used with the compactor to protect the detailed surfaces of the pavers from damage.

NORMAL MAINTENANCE AND CARE:

As with any product that is continually exposed to the natural environment, cleaning and care may be desired over time to maintain the appearance of your hard scapes. Generous rinsing with water and light scrubbing with a stiff, plastic bristle brush is generally the best way to remove dirt that has accumulated over time. Cleaners and mild detergent designed to be used on concrete products may be used as well. Always follow all manufacturer instructions and test on a small area when using any cleaner. Power washers may cause damage at close range.

WINTER CARE:

All metal snow shovels and snow blower blades have the potential to damage concrete surfaces. All snowplows, snow blowers and shovels used to clear HIGH FORMAT™ products of snow should use plastic blades or guards. De-icing salts will damage concrete and should not be used with HIGH FORMAT™ products unless they are made with TEKTRAMAT® technology. HIGH FORMAT™ does not cover damage done by snow removal, de-icing, or improper loading under warranty.

NATURAL STONE:

Natural stone is a product of nature. Surface texture and color will vary piece to piece and crate to crate. Our partnering quarries work hard to ship consistent, high quality product, but you should expect variation. Samples are suggested, but will not guarantee color. We highly recommend all material be delivered prior to installation and that available material is blended throughout your project. Each installation will be uniquely different and perfectly created in nature!
